TABLE OF CONTENTS
LIST OF TABLES
LIST OF FIGURES

Main Body:

1. Introduction and background to the general topic area:
    a. Should include a clear statement of the student's purpose of the Clinical Inquiry Project. It provides necessary background information and a broad statement summarizing the findings of the project. This section also will include a statement of the relationship between and among the various articles and parts of the project.

Article One

a. As published. e.g. Sections: Introduction, Review of Literature, Method, Results, Conclusions. Reference list (for Article 1) Appendices (for Article 1)

Article Two:

a. As published. e.g. Sections: Introduction, Review of Literature, Method, Results, Conclusions. Reference list (for Article 2) Appendices (for Article 2)

Conclusion

a. Overall conclusion and implications for policy and/or further research.

Appendices

1. Appendices: Include here only any additional appendices that relate to the manuscript as a whole.

References

1. All general references from the introduction, overall conclusion, and any supplementary sections should be included here and should conform to the same style and format as the articles.
