Nurse-Midwife Learning Objectives

At the completion of the Nurse-Midwife concentration, students will be able to:

- Demonstrate competence in the clinical practice of midwifery as characterized for Basic Midwifery Practice 2012 (American College of Nursing Midwives, 2012);
- Practice collaboratively within the health care system while providing primary care to women and newborns;
- Use midwifery knowledge, innovation, creativity, and cultural competence to adapt health care interventions based on the interrelationships among person, environment, and health;
- Analyze current knowledge for midwifery practice, evaluate effectiveness of health care interventions and use evidence-based care in clinical practice;
- Engage in scholarly activity to advance knowledge in women's health, newborn, and midwifery care and collect accurate clinical practice data/statistics, and;
- Provide leadership in women's health care through active involvement in professional organizations, clinical teaching, and political awareness/involvement.
