<u>Home Phone</u> _____	Business Phone _____	Email _____	

Please write a 2-3 page double-spaced description of your goals for PhD study. Address the following points in your comments:

1. Why are you seeking a PhD degree in Nursing at this time?
2. Discuss your career goals and how an earned PhD in Nursing will help you to achieve them.
3. What attracted you to the PhD program in Nursing at Wayne State University?
4. Identify the specific area/topic of research interest to you and describe how it fits with one or more of the College of Nursing's stated purposes of the PhD program as stated below:
 - To prepare scientists capable of generating rigorously tested knowledge that contributes to the positive development of individuals, families, communities, society and the discipline of Nursing.
 - To prepare nursing scholars who will test, generate and extend knowledge related to individuals', families', and communities' health promotion or to individuals' and families' symptom science; and to extend knowledge of urban environments that influence and alter health, and reduce health disparities.
 - To prepare leaders for the discipline and profession of Nursing.
5. Every applicant is encouraged to identify potential mentors among the College of Nursing (CON) faculty. Please identify at least two faculty members whose research area might match your general research area/topic. Faculty research interest areas can be found at: <http://nursing.wayne.edu/research/faculty.php>
